Local Students To Compete in Spring Festival

Arrangements Completed For School Music And A Dramatic Festival

Entries are now being filed for the 1rst annual School Music and Dramatic Festival to be held in Medicine Hat on Friday, May 5th. Schools from all parts of the inspectorate will be represented in competitions covering class singing, solos, recitations and dramatization. Silver cups are being awarded to class winners, gold medals to students winning 1rst place in individual events, and certificates to all those with second highest standing. The festival will take place in Fifth Avenue United Church and all winners will appear in a special concert in the evening, when prizes and trophies will be awarded. The adjudicators will be Inspector Williams for music and Miss Olive Fisher, of Calgary Normal School, for dramatics. Redcliff citizens will be given the opportunity to see all the local entries in the festival at a grand concert to be held on the evening of Friday, April 28th. This entertainment will bring together the finest array of musical and dramatic talent in the public school under the direction of the teachers. The proceeds of the entertainment will go towards the purchase of proper costumes for the Redcliff representatives in the festival.

The local students will be competing against the best talent from the Medicine Hat city schools. Rural school entries form a separate division.

An added feature of the program will be the annual high school oratorical competition. There are four strong finalists this year Margaret Rutherford Jean Paterson, Jim Brown and Albert Podesta. Those who hear these young orators this year will agree that they are even better than the speakers who caused such a sensation with their dynamic orations in the Cameo theatre last year.

The program on April 28th offers greater diversification than any yet attempted in Redcliff, music, recitals, orations, tragedy, comedy. It will be both educational and entertaining, pleasing to the eye as well as to the ear. Redcliff citizens have always given great support to local shows and it is anticipated that a record crowd will greet the efforts of the students and teachers to bring a few trophies back to Redcliff.

JUST FOR FUN

(Contributed)

A queer man from Redcliff once swore,
That he'd pay up his taxes no more,
When he found out, alas!
He'd no water nor gas,
Oh boy! was that citizen sore

British diplomats have arranged a conference between government heads of Britain, France, Germany and Italy to try to fix up the European situation.

Danish Bachelors Have Successful Event

Was Well Attended And Much Enjoyed By All

The play and dance sporcored by the Danish Bachelors, in the I. O. O. F. hall last Friday evening, was a great success.

Upon their arrival each English guest was given a neatly printed sheet upon which was a synopsis of the play. As the play was given in the Danish language this was greatly appreciated by those who received them. The play: "The Newly Weds," a comedy, was well acted from start to finish, each player taking his and her part very acceptably indeed.

Mrs. Jorgenson and Mr. Tom Jensen took the parts of the newly wed middle aged couple who were 'more tickled with each other than a pair of young ducks" as the synopsis said, and their acting clearly portrayed. Mrs. Jorgenson played a nice combination of newly wed exuberance and reserve, while Mr. Jensen more than excelled himself in his rheumatic and romantic effusions. Miss Knudsen made a charming maid and pleased the audience greatly with her soft Danish tones and naive questions and answers.

Mr. Madsen took the role of the jilted lover exceptionally well, and proved conclusively his ability to carry through successfully, a difficult part.

There were many highly amusing situations which were well sustained throughout and called forth prolonged laughter and applause from the audience. At the close of the play the four participants rendered two vocal numbers in the Danish language which were well received.

From then on the evening was given over to dancing, Messrs. G. Thomson and J. Schille officiating at the piano and violin respectively, in their usual inimicable style.

imical style.

At midnight sumptuous refreshments were served, after which dancing was resumed.

The hall was crowded to capacity but what was lacking in room was made up in enthusiasm, and the entertainment was pronounced by all as an unqualified success.

Alberta Hockey Champs Defeat B. C. Champs.

Now in Finals for Championship of West

Luscar Indians, provincial intermediate hockey champions advanced to the finals for Western Canada honors by taking a 2-0 victory from the Kimberly intermediates, British Columbia title holders, at the Arena Medicine Hat Saturday night. The teams played to a two-all draw on Thursday, giving the Alberta champions a 4-2 win on the round.

Luscar plays Unity, Sask., for the intermediate championship of Western Canada. These two teams met Tuesday at North Battleford when Unity won by a score of 2 to 1. The final game will be played to-night.

W. Demarski Found Unconscious In Review Office

Was Taken to The Hospita And Died Soon After Entering

One of the saddest accidents we have ever been called upon to record, occurred here last Saturday, as a result of which Wm. Demarski (better known around town as Bill Denny) lost his life.

Demarski had been at a dance the previous evening and, according to evidence given at the inquest, had become very intoxicated. After the dance Langley Stone and some of his friends with whom he was going home, found Demarski at the rear of the dance hall in a helpless condition. They decided he should be taken some place out of the cold and Langley volunteered to carry him to the Review office where he would be warm and more comfortable. On the way to the office Langley fell, spraining his ankle, and dropped Demarski to the ground. Not knowing the unfortunate man had suffered any ill effects from the fall, Langley secured the assistance of Ross McLachlan and together they got him to the office and made him as comfortable as possible, thinking he would soon sleep off his stupor and go home.

On opening the office the following morning, however, Demarski was found to be in bad shape. Dr. Ward was immediately called in and after examiation, pronounced his condition serious. Demarski was at once taken to the hospital where he died while his wound was being attended to.

An inquest was held on Monday by Coroner Dr. McEwan. After hearing the evidence of fourteen witnesses, the jury's verdict was that Wm. Demarski came to his death as a result of a fracture at the base of the skull caused by a fall while being carried to the Review office.

Deceased had been in Redcliff only a few months. His home is in Winnipeg.

Medicine Hat Players Win Dramatic Contest

Medicine Hat players, playing Barrie's "Twelve-Pound Look," were awarded first place in the Alberta Dramatic Festival held in Lethbridge last week. L.W. Brockington, of Calgary was the adjudicator.

The Medicine Hat players will now go to Ottawa as Alberta's representatives at the Dominion Drama League Festival to be held there this spring.

EDUCATON IN ALBERTA NOW BY CORRESPONDENCE

Nearly 800 pupils are registered this winter in the correspondence course in school work conducted by the provincial education department for benefit of children in outlying districts. The courses have to do only with public school work thus far, but the possibility of extending it to include high school work is being considered.

Badminton Tournament Here Last Monday

Local Players Win Most Games From Visitors

The badminton tournament between local players and members of Fifth Ave. Church Club, Medicine Hat which took place recently was a decided success for the home players.

Of the seventeen games played twelve were won by local club members.

In the Men's singles four games were played, all of which were won by Jensen, Weeks, Pow and Simpson against Ritchie, Alger, Walker and Dunn respectively.

In the ladies' singles two games were played in which Miss Seilhorn won from Miss Dunn and Miss McWaine lost to Mrs. Caldwell by only one point.

In the Men's Doubles the local players won two games out of the five played and in the Ladies Doubles both games played were won by Redcliff players.

The four games played in the Mixed Doubles resulted in three wins and one loss for the locals.

Horse Sale in Hat Proved a Success

Was Well Attended And Prices Were Very Good

Outstanding success was achieved in Medicine Hat's first annual horse sale held there last Friday. The sale was expected to run two days but brisk buying on Friday afternoon resulted in a clearing of all entries, about 300 head being disposed of, with prices averaging $45 to $50 a head. The average price was lowered by the entry of many range horses only halter broken.

The News says that as a result of the sale at least $18,000 was brought into the city and district. Horse buyers have expressed their intention of returning here to buy more horses in the near future.

Born in Edmonton on March 1st, to Mr. and Mrs. J. Horne, Redcliff, a daughter.

Utilities Board to be Here on March 22nd

Special Meeting of Council On Monday, March 20th

Town Council met in regular session last Mouday evening with the Mayor in the chair and the following councillors present: Hargrave, Lavelle, Sangster, Shaw and Newnham.

A letter from Mr. Blackstock was read, offering to rent the Barber store on behalf of Henry Van Wort. The matter was left over until the building could be examined by the building committee.

A letter from the Board of Utilities Commission re appointment of auditors, was read. It was moved by councillors Shaw and Hargrave that the letter be received and filed and that Messrs. Harvey-Morrison be appointed auditors for year 1933 at a salary of $450.00, plus expenses.

A letter was read from the Utilities Commissioners stating that they would be in Redcliff on March 22nd for the purpose of discussing the town's affairs with the council.

On motion of councillors Newnam and Sangster the request from the school board for $1000 for salaries, was granted.

It was decided to hold a special meeting of council on Monday, Marc 20th, to which members of industries and principal ratenayers of the town be invited to attend.

We hear a building is soon to be erected on Broadway.

Conditions in Europe are Now Reported Serious

Say it is Most Difficult Crisis Since The Great War

Reports last week-end of conditions in Europe were none too encouraging. They are described by leading papers as the most difficult crisis since the Great War. According to these reports France is vainly trying to make a pact with Britain as security against a Germany aflame with Fascist tyranny. Poland is moving troops to the German frontier. Jugoslavia is rent by internal quarrels and fears Italian aggression.. The Nazis are invading the demilitarized zone in the Rhineland, and Austria is threatened anew with civil war.

Face to face with such a tangle of feuds and jealousies Britain stands wondering how best to use her influence to moderate the passions that have revived war talk all over Europe, says one London paper. Two policies are recommended by her newspapers and publicists. One is of keeping out of all entangling alliances and the other demands that the country at any costs shall keep out of continental quarrels and shall declare in unequivocal terms that ..not one British soldier will be sent across the channel to take part in any European war."

Good Program For Dreamland Theatre

Also Some Good Shows Coming

New Dreamland presents two outstanding programs. This week end they are showing Sax Rohmer's Mystery Thriller "The Mask of Fu Manchu" which features an all star cast headed by Boris Karloff.

The story deals with the attempt of Fu Manchu to use the legend of Ghengis Khan, claims to be his reincarnation and achieves through Asiatic uprisings world dominion.

In this his wits are pitted against a Scotland Yard detective who eventually wins out.

This program is rounded out by some excellent short subjects, and you are assured of an excellent two hours entertainment. Do not miss this show.

Coming Monday, Constance Bennett's most dramatic role in "Rockabye". This is a story dealing with a gamin of the streets raised to high prestige as an actress of sophisticated drawing room comedies under the tutelage of a manager who adored her; then a scandal that smeared her fame with notoriety! But under all the glamour, romance, publicity and hullabaloo beneath her tempers and smiles despite her morals and quarrels she was just a woman who loved children and yearned for a true lover.

Hear her sing "Sleep my Sweet." This is one of her most outsanding pictures. Don't miss it.

Free dinnerware is given to every lady attending this show.

A Scheme To Raise Prices.

The tremendous decline in prices of all primary products in Canada, in common with similar declines throughout the world; the huge accumulation of unsettled war and other debts; the unparalled restrictions imposed by nearly all nations upon imports from other nations; the break-down of the gold standard and the resultant upsetting of exchange rates between countries; the stupendous number of unemployed throughout the world, and the loss or purchasing power by practically everybody as a result of these economic disasters and disabilities, have led to making of all kinds of proposals designed to remedy, either temporary or permanently, the situation in which mankind is now floundering.

Many of the suggestions advanced are hopelessly impracticable; some utterly fantastic; and not a few of the so-called remedies would only serve to intensify the disease rather than ameliorate or cure it. Unfortunately, the distress occasioned by the present world economic situation is so great, and people are so much at a loss in seeing any way out of their difficulties, or an early solution to their problems, that thousands of them are in a state of mind where they are prepared to grasp at any straw, and, the more alluring the promises made in support of any given scheme, the greater the danger of people "falling for" something which later on they would bitterly regret.

Included in the suggestions being advanced are numerous forms of "inflation" of money. Some advocate the printing by the Government of tens, even hundreds, of millions of paper money without any reserve of any value held against them. Others demand that steps be taken to bring the Canadian dollar to a parity with the British pound sterling. In scores of communities the issue of local scrip is strongly supported as a means of putting more money into circulation, speeding up business and the payment of debts, and as a means of raising prices of primary products. Some extremists advocate the repudiation of existing debt.

Despite the difficulty of their present situation, we believe the overwhelming majority of the Canadian people do not look upon repudiation of debt with favor; rather that they are willing to pay their debts and are anxious to do so, and only want to be placed in a position where they can pay. They feel they can pay their debts in the future, as they did in the past, if they could only obtain a fair price for their products above the cost of production, or steady work at a fair wage.

Because we are convinced such is the attitude of the average man, we are interested in the plan of Colin H. Burnell, past president of the United Farmers of Manitoba, as recently outlined by him in the press. Mr. Burnell proposes what he calls the Collective Produce Clearing Association, and, in brief, his plan is this:

A farmer producer brings, say a can of cream to a dairy for which he receives a cash ticket for 96 cents. Instead of cashing that ticket, he takes it to the Collective Produce Clearing Association and exchanges it for a Bond of $1.00. He buys a C.P.C.A. 4-cent stamp which he affixes to the Bond, endorses the same on the back, and then turns it in the same as a one dollar bill on any purchase he may make. The merchant to whom he pays it then adds another 4-cent C.P.C.A. stamp, endorses the Bond in turn, and pays it to someone else, who follows the same procedure, until the Bond has fourteen 4-cent stamps, or the equivalent of 56 cents on it, when the Bank will cash it and charge it against the account of the Collective Produce Clearing Association.

What has happened is this: The farmer producer received 96 cents, instead of 50 cents, for his can of cream. His purchasing power was nearly doubled. Each of the other thirteen people who receved the Bond and added a 4-cent stamp actually gave a 4 per cent. discount on the price of their goods or services. The C.P.C.A. got the original 50 cent cash ticket from the farmer and the 56 cents paid to it for stamps, or $1.06, consequently its account at the bank was good for $1.00 when the Bond was finally presented for payment.

Unquestionably, this is a form of inflation, but there was 50 per cent. cash back of every Bond issued. The 4 cents paid by each handler of the Bond some may argue was in the nature of a sales tax. May it not be even more fairly be called a 4 per cent. discount? And who in these days would not willingly grant a 4 per cent. discount if the volume of business could be practically doubled? As fast as these Produce Bonds were turned over fourteen times, and then cashed, one dollar of money would be placed in general circulation instead of only fifty cents had the farmer cashed his original cream check.

As Mr. Burnell points out, farm produce would flow to market as usual without interfering with prices which are set on an export basis. It would, he further adds, still allow of feeding the unemployed cheaply, but many of these would be absorbed by the greater volume of business which would result.

It is not argued that the scheme is perfect, nor that it is a permanent solution of existing difficulties. It is admitted that it may be considered somewhat cumbersome, but, so, too, is the present situation. There may be other criticisms, but Mr. Burnell's plan certainly overcomes many of the objections properly advanced against the usual issue of scrip plan.

One seeming weakness does suggest itself, but it is a detail and does not affect the principle of the scheme. That is, whether the margin of six cents on the dollar, which is all the profit the C.P.C.A. would receive, would be sufficient to cover the costs of operation, including printing of Bonds, stamps, distribution of same to all centres, and the bonding of an agent of the C.P.C.A. in each country town which it is proposed should be done. However, if a 4-cent stamp on each turnover of a $1.00 Bond was not sufficient for the purpose, a 5-cent stamp, or a 5 per cent. discount instead of four, would no doubt prove more than sufficient.

Mr. Burnell's plan is certainly deserving of further consideration and study by farmers, merchants, and, in fact, everybody because one and all are anxious to find some relief, even of a temporary character, from the impasse into which all have been brought and from which all are seeking a way of escape.

London has a new "Black Hand gang."

There are 701.5 persons per square mile in England.

Was So Short of Breath Could Not Lie Down to Sleep

MILBURN'S HEART AND NERVE PILLS

Mrs. F. J. Chernoff, Shoreacres, B.C., writes:—"I had been so troubled with shortness of breath I could not lie down to sleep.

I couldn't do any hard work, or climb the stairs, and had nervous and smothering feelings, and became very weak.

I tried all kinds of medicine, but could get no relief until after I had taken three boxes of Milburn's Heart and Nerve Pills, and since then I have felt better in every way."

For sale at all drug and general stores; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Abolition Of Poverty

American Investigator Has Cheery Word For the Future

W. F. Ogburn, who is Director of the Research committee of Social Trends which has been set up by the United States Government has a cheery word for the future. He sees ahead, when the clouds have rolled away, that strides will be made towards the abolition of poverty. There are four factors he thinks that determine the standard of living—population, natural resources, technology and economic organization.

"If the population is kept small," he argues, "that will be a great help in raising the standard of living. If the nation will plan the utilization of its oil, coal and other natural resources, eliminating the prodigious wastes of present-day organization, natural resources will be abundant for many years to come, and rising costs may be postponed.

"New inventions and new machines will be a great aid to raising the standard of living, the technocrats to the contrary notwithstanding, although they do for a time take jobs away from many men. Advancing technology will do far more to give us all more of the good things of life than any redistribution of wealth. The greatest difficulty to be overcome in raising the level of life is the economic organization, which has many serious weaknesses, but which is in no way in danger of collapse, unless there is another big war or a revolution."—Winnipeg Free Press.

Polarograph Is New Device

Instrument Has Been Perfected Which Analyzes Any Substance

The polarograph, a new instrument for chemical analysis of substance, liquid or solid, which, by the mere pressing of an electric switch, automatically registers on a paper in four or five minutes both the kind and the amount of chemical substances present, was described at New York by the Carnegie Endowment for International Peace.

Among the many uses for the new instrument, it was explained, is an almost instantaneous analysis of the contents and quality of all alcoholic liquors, which at present takes considerable time and expense. By the pressing of the button the polarograph will at once draw tell-tale curves on the paper which will tell exactly the kind of alcohol the liquor contains as well as the percentage.

Mongolian-Japanese Dictionary Completed

Is First Of Its Kind and Contains 2,000 Pages

After 16 years of work, Major Kenji Shimonaga of the Japanese War Office has completed a Mongolian-Japanese dictionary, the first of its kind, which will be published shortly by the army. It is a book of 2,000 pages.

The army long has given close attention to the study of foreign languages and has in its language school experts on nearly all tongues. Major Shimonaga has specialized Mongolian, Chinese dialects, Manchu and Tibetan. He had to design special type to reproduce the intricate Mongol characters appearing in his dictionary.

The Next Metal Age

Aluminum Will Be Widely Used Says American Professor

Civilization's next metal age will be that of aluminum. Prof. Colin G. Fink tells the American Institute of Electrical Engineers radical changes will come to the basic industries in 10 years through applying electricity to chemical processes, with aluminum as chief product. Aluminum trains will run along at 100 miles an hour; aluminum steamships will rip across the Atlantic; aluminum airplanes will drop weight and gather speed; skyscrapers will revolutionize with aluminum floors and glass walls. This is big news—it ought even to tickle technocracy out of its hopelessness.—Christian Science Monitor.

Small Wonder

A press despatch from Galt, Ontario, states that seventy guests at a Burns banquet were made ill by lemonade served there. Lemonade at a Burns banquet! Shades of the immortal poet! No wonder the guests were ill.

"Fruit" Hardly Right

The St. Thomas Times-Journal describes Canadian-made cod liver oil as "one of the fruits of the Imperial Conference." This Colyum can only say that anyone who thinks cod liver oil a fruit should have to take it as a punishment says the Toronto Star.

Colloidal Fuel Is New

Canadian Coal Can Be Used For It Says Ottawa Engineer

Of great interest to Canadian coal producers is the announcement of William Burnip, prominent Ottawa engineer, that Canadian coal may be used as the basis of a newly invented coal—colloidal fuel. A friend of Mr. Burnip, Stephen L. Wyndham, is the inventor, and Mr. Burnip, who was recently in Cardiff, Wales, has seen the invention demonstrated.

It has been a dream for years to invent a fuel by mixing coal with oil and getting a fluid mixture in which the coal would not settle down to the bottom. Mr. Burnip announced the invention has succeeded in producing samples of colloidal fuel—a combination of coal and oil—in stable mixtures varying from 60 per cent. coal and 40 per cent. oil to 80 per cent coal and 20 per cent. oil. In his announcement Mr. Burnip says the intriguing feature to Canada is that the fuel will be cheaper than oil and can be produced from Canadian coal. Even the oil used in the mixture, he says, can be replaced by coal tar and oils derived from the distillation of coal. He predicts its use in power plants requiring intense heat with flexibility of oil fuel.

"The value to the Canadian coal industry should be very marked," he says in stating the fuel could be used for oil-burning furnaces in the home.

In reporting the result of the various tests he witnessed recently before the South Wales Institute of Engineers, of which he is a member, he adds: "No one was prepared to witness the intense white glare given out by the burning colloidal fuel, against which the flame from the best quality fuel oil appeared yellow and smoky, both burnt under exactly the same conditions."

Precious experiments have failed because the coal has sunk to the bottom of the mixture. Wyndham has added what is called a "stabilizer." During the process of mixing, each bit of coal, ground to a particle, becomes coated with a film of stabilizer, which causes to it even a high temperature. The result is each coal particle floats permanently in the mixture and the product looks like vaseline when cold and flows like coal oil when about 80 degrees Fahrenheit. Its density results in a tank built to hold 500 tons of fuel oil accommodating 650 tons of colloidal fuel.

Mr. Burnip says the interest of the oil and coal world was thoroughly aroused recently when the Cunard steamship line used some colloidal fuel in one of their steamships on a voyage with distinct success. Something attempted in the way of a liquid fuel, using present coal field products, has caused interest for years.

The lawyer looked up as his friend dashed into the office.

"Hullo, whats up?" he said.

"Friend of mine just been run in for stealing whisky," explained the other excitedly. "Will you take the case?"

"Sure—if it's going cheap," was the reply.

The Doctor's Trade Mark

Doctors in Berlin may now carry an extra lamp on their cars. This shows a red cross on a green background, and is for use only on occasions of urgency, when the policeman will get them through traffic as quickly as possible.

SOURED ON THE WORLD?—THAT'S LIVER

Wake up your Liver Bile —No Calomel necessary

Many people who feel sour, sluggish and generally wretched make the mistake of taking pills, oil, mineral water, laxative candy or chewing gum, or roughage which only move the bowels and ignore the liver.

What you need is to wake up your liver bile. Feed your liver poutine the daily two pounds of liquid bile into your bowels. Get your stomach and intestines working as they should, once more.

Carter's Little Liver Pills will soon fix you up. Purely vegetable (safe). Sure. Quick. Ask for them by name. Refuse substitutes. All 25c at all druggists. 41

The Instinct Of Birds

Is Just Acute Sense Of Sight and Hearing

The mystery of how migrating birds find their way unerringly to their destination will probably be dispelled by further field observations, it is predicted.

Repeated observations of the behaviour of migrating birds have convinced Prof. Patten of Sheffield University, that they are not guided by any "special sense" but that they find their way by watching their surroundings and by profiting from experience.

"Birds possess an 'eye-brain'," he says. "Their sense of vision is extraordinarily acute and by no means indiscriminating. It seems unreasonable to brush aside the idea that migrants may obtain guidance by taking stock of landmarks. Furthermore, the sense of hearing can play a part. The wash of the waves is a reminder to hug the coast—the guide-line of primary importance. The courses of great rivers are followed by overland migrants.

"Birds band together for the trip, thus giving the untravelled young an opportunity to be guided over the route by adults who have already been over the ground.

"In thick weather migrating birds often go astray, and, arriving at unaccustomed haunts are classified as rare and accidental vagrants. When the gloom deepens the voyagers become sorely handicapped, while a dense and prolonged fog will put the brakes effectually on migration."

Fewer Sea Fish Caught

Fishermen Curtailed Efforts Last Year Because Market Was Poor

Excellent reasons for eating Canadian fish are that fish are nourishing and health-making foods, and that Canadian fish are unexcelled in quality. We call attention to these facts in the hope that people will eat more fish and, in that way, assist the fishermen to make a better living.

The Fisheries News Bulletin, issued by the Department of Fisheries, Ottawa, states that exclusive of the catches from one or two minor fisheries, the landings from Canada's sea fishing operations in 1932, as shown by unrevised statistics, totalled approximately 7,120,000 hundredweights. This total was smaller than the sea fisheries total for 1931 because with economic unsettlement continuing throughout the world during 1932 the fishermen curtailed their fishing effort. The reduction in landings reflects market disturbance. Plenty more fish could have been taken from the Dominions sea fisheries resources if the market situation had warranted greater catching efforts.—Toronto Mail and Empire.

Ban Is Lifted

Freight May Now Be Shipped To Churchill Without Permit

Further indications of the opening of Churchill to the public this year is seen in the recent ruling on the Hudson Bay railway to the effect that freight may now be shipped to Churchill without a permit.

A similar ruling applies to passenger traffic. Since the steel reached Churchill in March, 1929, it has been necessary to have a permit to enter the port or ship goods to the seas. This ruling was the subject of much criticism, among traders and others who had business in the far north. Last year the road was open to the public as far as Gilam Mile 327. Permits were required from that point to sea.

The new ruling lifting the permit ban came without publicity or advertising. Railroaders say that it was the desire not to encourage a trek in the direction of the new port while the townsite lacked facilities for handling transient traffic.

Colorful Rubber Dishes

Pale plastic crepe rubber, said to be odorless and tasteless, is being used to make plates and tumblers at Akron, Ohio. The new "unbreakables" are being made in brilliant and artistic colors, and they are expected to displace the old blue porcelain, the decorated china and the glass and paper utensils for general use. The rubber can be colored with any desired pigment.

A Gigantic Apple

Cordelia, Georgia, has a replica of an apple in steel and concrete, 22 feet in circumference, as a monument in its public square. The "apple" weighs 5,000 pounds and is mounted on a base eight feet in height.

Australia expects a bumper 1933 crops.

Lend us your ear! Ogden's Fine Cut cigarette tobacco is just right to "roll your own." It measures up in every way to a man's notion of what a cigarette tobacco ought to be!

Easier to roll for one thing. And a far better cigarette when the rolling's done and you light it up. Yes, sir. You'll like Ogden's Fine Cut. It gives you the combination you're looking for in cigarette tobacco . . . fragrance . . . sweetness . . . absolute satisfaction. That's worth a cheer any day!

P.S.—Free "Chantecler" cigarette papers with every package.

Your pipe knows Ogden's Cut Plug

Brevity In Speech

Ontario Judge Thinks Half Hour Address Long Enough

Much may be said for the statement made by Judge Hawley Mott when questioned by a reporter recently in Bowmanville, Ontario, as to the reason that he only spoke for 30 minutes at the Women's Canadian Club. Judge Mott said that any man should be able to express all he has to say in 30 minutes and if he could not then he should not rise to speak. Some men are notoriously long winded in an address, so long-winded in fact, that by the time they have concluded their talk the chances are ten to one that the audience have completely forgotten the first part of his remarks.

Saskatchewan Power

Commission Shows a Deficit Of $50,979 For Year 1932

Despite an operating profit of $132,217 for the year 1932, the balance sheet of the Saskatchewan power commission showed a deficit of $50,979, when provision was made for depreciation charges, according to the annual report tabled in the legislature by Hon. J. H. Merkley, Minister in charge.

The report indicated that no new undertakings nor extensions had been embarked upon by the commission in 1932, the second year in which the activities of the commission have been confined almost solely to operation of existing systems.

The output of gold from the placer deposits of the Yukon territory in 1932 had a value of $500,000. In 1900, the greatest year of the Klondyke gold production, the output was valued at over $22,000,000.

for RHEUMATISM

Pour Minard's into a warm cloth. Rub liniment gently in; then apply it according to directions . . . and soon you'll get relief!

MINARD'S "KING OF PAIN" LINIMENT

Unique Plant Is Set Up In Ontario Town For Extraction Of Radium From Pitchblende

A prospector high above Great Bear Lake looked down. Strange markings on the shore of the lake lured him. The next year he returned and found pitchblende, mineral from which radium is derived. From that casual glance came Canada's first radium refinery at Port Hope, Ont.

It's a queer place, this refinery. A long concrete building surrounded by a high wire fence. A strange place. The front door is locked. The fence seems insurmountable. A watchman at the gate scrutinises people closely. A show of credentials and finally, admittance.

A long white table covered with jars of minerals. A big safe. Bunsen burners, one burning steadily. A small retort filled with mineral, "stewing" over the burner.

In the background the factory. Huge tanks on one side. On the other, a maze of pipes, stairs, earthenware crucibles, pots. On the left the tanks for uranium extraction. On the right, the machinery for the production of the world's most valuable "salt." For it looks like salt, this load-packed radium which is so greatly needed for cancer treatment. But there is a vast difference. A needle no larger than that used in a phonograph is worth $650 when filled with radium.

But with M. L. Pochon, scientist who learned his trade in Paris, let us climb to the roof, the "top of the world," as Mr. Pochon says. Wooden stairways wind around the machinery. At the top is a narrow platform. There are bags of ore, pitchblende. There are carboys of chemicals. Into two electrically-stirred vats the ore and chemicals are poured. The ore is a black powder, already ground.

The mixture is heated and stirred. Strange things happen. It travels by gravity and vacuum pump into other vats, through rubber-lined pipes. Finally the uranium and residue is drawn off. The white precipitate containing the radium is removed to the laboratory. The residue starts up to the top again and moves through a succession of wooden tanks until it emerges as a yellow powder, used for ceramics and pigments.

But that is of minor importance. Let us follow the radium to the "lab" for the final processing.

There are dozens of quartz bowls in the "lab." The radium, in liquid solution, moves from one to the other. The liquid crystallizes. It travels on and on, the bulk becoming less and less. From the big vats in which it started it moves gradually into smaller glasses and bowls. Eventually, it reached a small container no larger than Milady's thimble. It is pure radium now, nearly ready to take its place in the fight against the dread scourge of cancer.

In many cases the radium must now be placed in surgical needles. This is a delicate and dangerous operation. For radium's emanation and radiation are dangerous. Hence the chemist, as he fills the needles, must be protected. He sits before a glass case. He places his hands in rubber gloves, through holes in the end of the case. Across the section where his chest rests runs a heavy lead pad. The rays are absorbed by lead, while the sealed glass case retains the bulk of emanation.

It takes hours to fill each tiny needle. Then the radium is weighed on scales so delicate the markings of a lead pencil on a sheet of paper would upset their balance. They will weigh 1-160th of a milligram, and there are 1,000 milligrams in a gram. It is delicate work.

In the laboratory too is a large vat of water. After each operation the scientists wash their hands in this vat. When the vat becomes filled it too is submitted to the final processing given the radium itself. Every possible atom of the radium is extracted, for it is of vast value.

And as was often said of pigs at the Chicago stock-yards, everything is used but the "squeal."

Had Good Train'ng

Coach (to new man)—You're great! The way you hammer the line, dodge, tackle your man and worm through your opponents is simply marvellous.

New Player (modestly)—I guess it all comes from my early training, sir. You see my mother used to take me shopping with her on bargain days.

Coffee grown in Guatemala last season filled 567,000 sacks.

W. N. U. 1983

Holland's Plans Going Ahead

Reclamation Of Land Involves Total Cost Of Four Hundred Million

While public works in many parts of the world are at a standstill owing to the financial stringency it is interesting to note that work on Holland's great 20-mile barring dam across the Zuider Zee and the reclamation plans connected therewith go merrily ahead. In fact, work on the dam proper has been completed and it is now possible to drive across the sea in a motor car or other conveyance. The dam is a unique connection between the two Dutch provinces, North Holland and Friesland. It is part of the Zuider Zee reclaiming plan, which involves a total cost of $400,000,000, of which 550,000 acres of new territory are to be won. The final of four polders, covering an area of 50,000 acres, is already in cultivation. The dam itself, huge batteries of locks and bridges included, has called for an expense of $600,000,000, is 300 feet wide and carries a railway track, a highway for fast traffic, a cyclists' path and a road for pedestrians.—St. Thomas Times-Journal.

Hard Times

Comparing the Present Era With the Difficult Times Of 1894

Frequent comparison is heard of the present era with the "hard times" of 1894, but so far we have heard of no one going back to drinking "sin and misery" as a substitute for coffee. "Sin and misery" was made by burning bread until black, and then steeping it as a tea, explains A. E. Hatch. It received its name through a remark of a neighbor of the Hatch family at that time that "It is a sin to burn the bread and misery to drink it."—Wakonda, S.D., Monitor.

By Ruth Rogers

TINY GIRLS LOVE TO WEAR FREE AND EASY CLOTHES FOR PLAYTIME

And won't she love this cunning dress? The fulness hangs from the brief French yoke. The skirt may join the yoke with pin tucks or with soft gathering as in the back view.

It is very dainty—and yet very practical in yellow batiste with tiny white dots and plain white trim.

Blue ground dimity with wee white posies and white contrast is another delicious scheme.

Pique, linen, gingham and seersucker are other sturdy smart suggestions.

Style No. 465 is designed for sizes 2, 4 and 6 years.

Size 4 requires 1¼ yards 35-inch, with ⅝ yard 35-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

WHERE THE NEW WAR IS FLAMING

Here is a map showing the location of the outbreak of hostilities between Colombia and Peru, which ended a century of peace between the two nations. For many weeks Colombia and Peru have been disputing the small area about the frontier town of Leticia, which was ceded to Colombia by treaty some years ago. The dispute reached a climax with the bombing of a Colombia gunboat by Peruvian planes on the Putumayo River and the capture of the town of Tarapaca by Colombia forces. The disputed area is like a match in a powder magazine, as Brazil and Ecuador are likely to be drawn into the brawl before the business is settled.

Program For Recovery

Helps To Prosperity As Seen By Secretary Of U.S. Treasury

Ogden L. Mills, United States secretary of the treasury, urges as a program for recovery:

"First, a balanced budget; second, an easy money policy consistently pursued by the principal central banks; third, a definite attack on the debt problem, not by wholesale treatment but by setting up adequate machinery to deal with different categories of debt; fourth, a settlement of the foreign debt question; fifth, a stabilization of world exchanges by a return in the first instance to the gold standard by the more important commercial and industrial countries; sixth, the lifting of arbitrary trade barriers."

This is partially a program for the United States and partially a program for the world.

For Canada, there can be drawn up a program to aid recovery that would be this country's most useful contribution to its own and the world's prosperity.

It is as follows:

1. Balance the federal budget.
2. Balance the provincial budgets.
3. Reduce local taxation.

All else is secondary and most of the other aids to recovery would follow naturally.—Financial Post.

Canadian Airways

More Than a Million Miles Flown By Machines In 1932

Nearly 9,000 passengers were carried by the Canadian Airways in 1932, according to operating statistics released recently.

Passengers carried on mail lines numbered 807, on other lines of the company, 8,963.

The mail carried during the year amounted to 299,086 pounds. Freight and express carried by Canadian Airways 'planes totalled 1,870,136 pounds.

More than a million miles were flown by Canadian Airways machines in 1932. Of this total, 287,372 were flown on mail lines and 1,006,833 were flown on the company's other lines.

Two hundred pounds of hay, corn, and roots make a day's meal for an elephant.

Issues Warning

Says United States Is Inviting War By Its Weakness

A stern warning that the United States is "inviting war" by its "weakness" in naval strength was made by Rear-Admiral William A. Moffett.

The outspoken chief of naval aeronautics said Americans "are too busy boasting that we are the greatest nation on earth."

"It never seems to occur to us, in our conceit," he said, "that another nation may declare war against us." In that event, he added, the United States would find itself in a position of holding "a pair of deuces against a full house."

Moffett addressed the Naval Academy Graduates' Association of New York at its annual banquet. His listeners heard a frank discussion of events in the Far East and prospects for continued world peace. The admiral was bitter in his criticism of this nation for being a party to the Washington treaty of 1922. "Uncle Sam lost everything but his shirt tail when he signed the Washington treaty," he said.

Moffett expressed veiled warnings of what Japan might accomplish by building a navy for the puppet state of Manchoukuo. "Such a navy would not be subject to treaty limitations, including the treaty ratios," he said.

More Radio Licenses

Increasing Number Of People Shown To Be Using Radios

People are buying radios and taking out licenses for them in increasing degree, says the monthly statement of the radio branch of the marine department. For the 10 months of the fiscal year ending January, over 100,000 more licenses were issued than in the whole of the previous year. The 10 months' total was 716,553, as compared with 598,358 in the fiscal year ended in 1932.

The teacher was putting questions to the class.

"What do we call a man," he asked, "who keeps on talking and talking when people are no longer interested?"

"Please, sir," replied a boy, "a teacher."

FASCIST CHANCELLOR AND HIS CONSERVATIVE AIDE

Here is the first picture of Adolf Hitler (left), to arrive in Canada since his elevation to the Chancellorship of Germany. With the Nazi leader is Colonel Franz von Papen, former Chancellor, who is now Vice-Chancellor in Hitler's cabinet and Dictator of Prussia.

Fastest Train In The World, Operated In Germany, Has The Speed Of An Aeroplane

Speedy as an airplane, cheaper than a locomotive, cheaper too, perhaps, than automobile transportation, the new German Diesel-motored express train has stood all its test trips with a success that has attracted the attention of railroad men from all over the world, and now the "flying Hamburger" has been entered as the "fastest train on earth" for regular service on the Hamburg-Berlin route beginning in March.

Personal experience of the "lightning train," as the Germans call it, is sufficient to bring conviction that this may after all be the railroads' answer to steadily growing competition of automobiles. It is sufficient, too, to justify the inclusion of the "flying Hamburger" in that remarkable series of post-war technical achievements by German engineers—the Zeppelin, the Europa, the Bremen and the "Do-X."

The long, low, violet, and cream colored, stream-lined car, pulls out of the Lehrter station in Berlin at 10:30 o'clock in the morning. The 100 passengers, luxuriously accommodated, are scarcely aware that even before the train has cleared the maze of local switches the speed has reached the average top of a through express in the open country. At sixty miles an hour the vibration is hardly perceptible.

Beyond the suburbs the speed increases to seventy, eighty, and then on a straightaway it jumps to ninety miles an hour. Now there are very few persons in the world who have travelled ninety miles an hour on a railroad train, but any traveller who has ridden the fast transcontinental trains of America knows how it feels to be going at seventy or seventy-five. We were sure the "flying Hamburger" was not making more than seventy-five when our hosts asked us to visit the motorman's compartment.

There, up in front, the speedometer showed ninety, then ninety-five, then 100 and finally hovered around the maximum, 104 miles an hour, the fastest speed ever reached by a motor-driven, propellerless vehicle on rails. Controlling this speed, controlling every adjustment of the combined Diesel-engine, dynamo-motor unit, the motorman had but one movement to make. The entire control is centred in a single handle, simple as the control of a street car.

Our vibration was even less than in an ordinary Pullman at half the speed. One good reason is the understung construction, and this is unique in the "flying Hamburger," for here the inventor, Dr. Frederick Fuchs, director of the Federal Railways, solved for the first time, the problem of compressing the whole motive power, consisting of two 410-horse-power Diesel engines and two electric generators, in two compact units, slung just above the rails, so that the centre of gravity is very near the roadbed and the train hugs the ground so closely that it can take curves at double the speed of an ordinary train.

But up in front the sense of velocity became impressive. The rails stretched out in endless bands of silver and they poured down the maw of our hooded monster at a rate that made one gasp. An express train, laboring along on a parallel track in our direction, seemed standing still as we shot past.

We were going at a speed of forty-five meters a second. The German rails are fifteen meters long. Some idea of what 104 miles an hour is may be gained from the fact we were hitting three railclicks a second. This was so fast it blurred the clicks into a steady hum.

Back in the passengers' compartment nobody noticed the speed, and the waiters from the buffet-bar served soup and coffee with no more difficulty than on the diner of the North Express. We pulled into Hamburg at 12:50, and a vast crowd peered over the embankment railings to watch the goggle-eyed snout of the "lightning train" nose to rest just two hours and twenty minutes after it had left Berlin. We had cut nearly an hour off the ordinary train time from Berlin to Hamburg and had covered the 187 miles at an average of eighty miles an hour.

But the train had just warmed up. Without refueling, and without the necessity of stopping for anything, the "flying Hamburger" can run 1,300 miles, or from Berlin to Paris and back non-stop. It could be made to develop an average speed much higher than eighty miles an hour, but not on the existing crowded trackage. An extra track from Berlin to Hamburg would make possible an average speed of 100 miles an hour, so that the trip between these two cities could be made in under two hours.

But the profitability of the "flying Hamburger" depends, of course, on its cost. The first unit cost $90,000 to build, according to Dr. Fuchs. This is more than it would cost in anything like mass production. But the operating cost, according to Dr. Fuchs, is one-fourth the cost of running a steam locomotive train with the same carrying capacity.

At the moment its speed is also greater, from station to station, than the normal airplane speed. Planes now in use in Germany would require an hour and a half from field to field, but another hour has to be added for transportation to and from the fields, making a total of two hours and thirty minutes against the "flying Hamburger's" two hours and twenty minutes.

Public Misunderstandings

Sole Obstacle In the Way Of War Debt Settlement

The need for an attitude by the layman in economics similar to that of the layman in preventive science was urged by Sir Norman Angell at the Oxford Luncheon Club. In that way only, he said, could we be sure that our society would not relapse into utter chaos.

Sir Norman, who has just returned from the United States, said that public misunderstanding was one of the sole obstacle in the way of a settlement of the debt question. "We are going to face in the matter of debt settlement," he said, "a period of great bitterness in attitude on the part of the United States which will postpone the general financial and economic settlement. That postponement owing to American policy and attitude is not due to the fact that Americans are more avaricious than anyone else.

"I believe sincerely that their attitude is just similar to that of ours on reparations 15 years ago. Broadly, the situation is that you have on one side in the United States all the economists, all the experts, and all the bankers standing either for cancellation or ruthless scaling down of the debts. On the other side of the fence you have the great multitudes, the electorates, and the politicians standing for payment to the last dot. The terror of the politicians in the presence of popular misunderstanding is intense."—Manchester Guardian.

The Pied Piper of Hamlin has taken to the air. Swarms of rats and mice made a sudden appearance in the North Caucasus area in Russia, and became so destructive, appeals for help were made. A squadron of five aeroplanes was dispatched to the district and by use of poison dropped from the air succeeded in exterminating them.

"Smith wants me to lend him $5. Do you advise me to do so?"

"You would be doing me a personal favor."

"How is that?"

"If he does not get the money from you he will come to me."

Editor—"My boy, your punctuation and grammar are something fierce."

Literary Aspirant—"Then there is no hope for me?"

"Sure there is; try dialect stories."

MORE ENCOURAGNG

The despatch and courage with which President Roosevelt has tackled the problems confronting him and his country immediately after his inauguration, should be a sourse of great encouragement not only to the people of the United States, but to the world at large.

For the past few years it has been generally believed in other parts of the world, as well as by a large percentage of the people of the United States, that at least a partial cure for the many ills from which the universe is suffering was in the hands of the government and people of the nation to the south. For this reason the policy of the new American administration was looked forward to with keen interest. The decisive victory for President Roosevelt in the election showed that the United States, like the world, has lost much of its faith in orthodoxy and was prepared to accept the suggestion that desperate conditions require desperate remedies.

President Roosevelt's first move last week in taking a firm stand in connection with the banking situation has done much to restore confidence in the United States where the people had become so fearful and panicky that they had withdrawn nearly a billion dollars from their banks in a few days.

While the happenings of last week furnished another reminder that London is still the world's greatest financial centre, nevertheless it is also recognized that the United States holds a very important position in the financial world. It is hoped her first move to put her own house in order will be soon followed by other movements of world significance.

Redcliff Reminiscences

Taken From Our File of March 20th 1914

The Redcliff school trustees have decided to place an ornamental iron fence around the school block. They also contemplate building a caretaker's residence on the school grounds as his services are constantly needed in and about the school.

John Tinmouth was awarded $840.75 by Justice Walsh for a broken leg sustained while working at the plant of the Redcliff Clay Products.

TAKE ADVANTAGE OF ADVANCE IN PRICE

Following the increase in the price of wheat there was an acceleration in the primary movement of wheat from Alberta farms and additional heavy sales last week end. Many farmers who have been carrying their wheat in terminal elevators have sold heavily during the past week. Wheat has risen some 14 cents above the low level of 38 cents on December 16th last. It is estimated that there are approximately 30,000,000 bushels of wheat yet to be delivered in Alberta.

MAN'S HEART STOPPED, STOMACH GAS CAUSE

W. L. Adams was bloated so with gas that his heart often missed beats after eating. Adlerika rid him of all gas, and now he eats anything and feels fine. Cecil T Hall Druggist.

Roosevelt Recommends Legal Sale of Beer

Has Support of Representatives of Both Parties

President Roosevelt has recommended to the Congress the passage of legislation for the immediate modification of the Volstead Act, in order to legalize the manufacture and sale of beer and other beverages of such alcoholic content as is permissable under the constitution and to provide through such manufacture and sale by substantial taxes, a proper and much needed revenue for the government. The President appears to have the necessary support from both parties to carry his suggestion through.

Aviation Problems

Subject For Debate Before Interested Audience In London

Four days after the 67th anniversary of its foundation the Royal Aeronautical Society, which is the oldest institution devoted to aerial matters in the world, held the first debate in its history. A crowded audience in a London lecture hall listened for two hours to some of the leading men in British aviation as they spoke on various aspects of official control of flying, centred around the motion before the assembly that "civil aviation differs from military aviation and should be treated accordingly."

C. R. Fairey, president of the society, excused the innovation on the grounds the motion touched on matters of vital import to the future of British flying. General J. E. B. Seely, new chairman of the Air League, answered emphatically those who believed the air weapon was of all means of warfare the most cruel. He cited the terrible effects of blockade as practiced against the central powers in the last great war as part of his proof that the air arm, properly employed, was more humane than some other means of forcing an enemy to sue for peace.

Members of the House of Commons, notably Capt. H. H. Balfour, deplored the ignorance of aviation that marked the "mother of parliaments" as the present day and the entire absence of interest displayed by the majority of politicians in one of the most significant happenings of the 20th century. Handley Page, pioneer aircraft constructor and airline operator, had much to say about the extraordinary workings in Europe of the present system of air transport subsidies. He urged the pseudo-military systems, masqueraded under the guise of commercial ventures in some European states could only be countered by drastic revision of subsidy arrangements and by placing all air transport on a really business footing.

He showed that 14 countries in Europe expended more than £4,000,000 annually in direct subsidy to air transport lines. Only one of those nations—Holland—shares with Great Britain the possession of air lines which are approaching real commercial and economic operation.

Mr. Handley Page made the assumption that the passengers airborne on the continental airlines in a year weighed approximately 15,000 tons (at 10 stone to a load) and on this basis he arrived at the astonishing conclusion that the carriage of every airline passenger costs about 16 in direct subsidy. This was explained by observers that many of the present routes were operated for political and military, rather than commercial, reasons by aeroplanes which are uneconomic because they are designed with an eye to possible military eventualities.

England and Holland were showing the way to real commercial exploitation of the aeroplane. The sooner all of the world's air liners are run on a similar basis, the better for aviation, he declared.

Physician Takes To Air

Oklahoma Doctor Looks After Patients In Five States

Mangum, Oklahoma, boasts of a physician who has a unique method of carrying on his medical practice. Dr. G. Fowler Border virtually has taken his practice "up in the air," and estimates he travels approximately 50,000 miles by aeroplane yearly caring for his patients.

Dr. Broder, in his "air ambulance," a four-cabin monoplane, administers to patients in five states—Oklahoma, Texas, Arkansas, Kansas and Louisiana.

A Perfect Landlord

New York Man Carrying Tenants Until Times Improve

Michael Sypiewski is the perfect landlord. He returned a cheque to the Poor and Alms Department of New York, which was to pay him for back rent from tenants who have become charges of the city.

Sypiewski returned the cheque, saying that as all his tenants were honest and had been living in his house long enough to own it he would carry them along until times got better.

During a carnival in the Southern States a Senator rode a jackass up the steps of the state capitol. Arithmetical calculation assures us that one and one make two.

Rhode Island bent, creeping bent, and Canadian bluegrass are the best grasses to plant in shady places.

BALDWIN OPENS A WONDER LABORATORY AT CAMBRIDGE

A wonder laboratory for research work was opened by the Right Hon. Stanley Baldwin at Cambridge this month which contains apparatus which will split the atom on a scale unknown before. The building is the new Ludwig Mond Laboratory, where the Russian scientist, Professor Kapitza (right), will carry on his atomic research. The photo on the left shows part of the laboratory in which can be seen a hydrogen liquefier for making liquid temperatire minus 253 centigrade.

Color Protection For Foods

Green Is Most Useful With Black As Second Best

The department of agriculture has publicly patented the discovery that oil-bearing foods are best protected from the sun's rays by grass green or black. The discovery was based on the findings of Mayne B. Coe, a young chemist, who ascertained that green is the most desirable for food protection from rancidity, and black is a second best.

Approximately $1,000,000 worth of food spoils annually in the United States the department finds, and believes inauguration of the color protection will go a long way in saving foods. Coe reported that food exposed in clear glass containers spoiled most quickly, that yellowish or bluish green failed to protect.

The green must be of the chlorophyl hue, scientifically described as the portion of the spectrum lying between 4,900 and 5,600 angstrom units. The established protection applies to oil-bearing fields, but Coe is continuing experimentation to ascertain if other colors will guard the sweetness and purity of non-oil bearing foods.

The green protective principle applies to butter, salad oil, lard, pecans, cashew nuts, potato chips, mayonnaise, whole wheat flour, cornmeal, many bakery products and foods containing some quantity of oil. Sunlight hastens the photo-chemical decomposition of silk. Experiments have shown, Coe said, that ultra-violet and infra red rays causes quick decomposition of certain foods.

Ex-Kaiser Has Mascot

Sachet Once Belonged To King William Of Prussia

The ex-Kaiser still keeps, it is said, the mascot which was given by a little girl to King William of Prussia on the eve of the battle of Sedan in 1870. It is a sachet containing what once was a sprig of four-leaved clover. After the defeat of the French the King returned the mascot to the child with the wish that it would bring her as much luck as it had brought him: but years after the ex-Kaiser bought it back and during the war carried it everywhere, it is said.

Shorten Length Of River

Engineers Have Cut Ten Miles Off The Mississippi

Ten miles was clipped off the length of the Mississippi River when government engineers, using tons of dynamite, blasted a hole into the embankment at Diamond Point, south of Natchez, and allowed the river to flow into a new channel. It took two dredges working in opposite directions nearly three months to cut the channel through the point and the dynamite did the rest.

An organization of nature-lovers is asking Congress to pick a national tree. Without wishing to prejudice the thing, we'd say off-hand that the plum appeals most strongly to the chosen representatives of the people.

Mother—"What made you stay so late Have a flat tire?"

Daughter (dreamily)—"No, mother, I'd hardly call him flat."

No living species of birds have teeth.

An airplane of 100 horse-power costs between $2,500 and $4,000.

Ancient Egyptian Brewers

Papyri Shows Life As It Was 2,000 Years Ago

Even as United States legislators of the present and those of Canada in the not too distant past, governments had their problems in regulating the beer business back in 254 B.C.

From ancient Papyri, some of them filled with worm holes, research workers at Columbia university are evoking a picture of life as it was 2,000 years ago.

One group of the documents shows that in ancient Egypt brewing was under government regulation. The state furnished a given amount of barley each day to the brewers and demanded a certain amount of beer in return. A letter written by Apollonios, Ptolemy's treasurer, on May 21, 254 B.C., rakes a brewer over the coals for furnishing the government beer from only 11 bushels of barley instead of the 12 bushels he had contracted to make into beer.

Prepare For 1933 Crop

To Be No Deliberate Cut In Acreage On Western Farms

While some members of agrarian bodies in the three prairie provinces favor curtailment of wheat planting this spring, there will be no deliberate policy of acreage reduction, farmer leaders believe.

At annual conventions the farm organizations have gone on record as favoring an international conference of chief wheat exporting countries with a view to working out some common policy of decreased production. Unless all exporting countries were to fall in line, they declared, Canada could not afford to take such a step alone. Reduction of wheat output in the Dominion might cause loss of export markets.

A Very Old Port

Southampton has been an important trading center for the interchange of British and foreign goods ever since the days of the Phoenicians and Ancient Greeks 1,500 years ago. Today 170,000,000 tons of shipping enter the docks annually.

"It is time baby was christened."

"Yes, your reverence; but we don't know for certain which of his uncles has the most money."

Health Of Jobless Impaired

Millions Unable To Get Enough Food Opinion Of League Committee

In the given opinion of the health committee of the League of Nations, the world crisis has now become so acute as to have serious effects on public health.

This opinion was arrived at in the light of data contained in a report submitted to the committee. This report shows that there are some 50 to 60 millions of persons in the world directly or indirectly affected by unemployment.

The report shows that a large number of unemployed in more than one country have not the means to obtain the minimum of food necessary for health, not to mention expenditure on boots, clothes and rent. But, indirectly, the insufficiency of food, through weakening of the body, allows disease and particularly tuberculosis, to gain hold more easily, and the psychological effects of prolonged unemployment may give rise to mental troubles.

A further problem arises from the exodus of the unemployed from towns and settlement in allotments where sanitation is often defective.

Has Peculiar Privilege

English Lord Can Use Livery Reserved For Royal Servants

A peculair privilege belongs to Lord Inchiquin, who celebrated his thirty-sixth anniversary a few days ago. He is the only man in the United Kingdom entitle to dress his servants in scarlet liveries such as are worn by attendant upon the King. This unique privilege was granted to the family by Henry VIII. as compensation to the O'Briens—of whom Lord Inchiquin is titular chief—for relinquishing a claim to the sovereignty of Southern Ireland. The O'Briens were Kings of Munster for centuries.

No artist can paint a self-made man as big as he thinks he is.

◆ FANCIFUL FABLES ◆

Report Furs Farrs Scarce

Catch In Fort Reliance Area Mostly White Fox

Contrary to most reports this year from the Northwest Territories, furs in and around Fort Reliance are not plentiful, according to A. E. McFarland, a trapper who was forced to return to civilization by illness. He arrived in Edmonton on the N.A.R. train from McMurray after an aeroplane flight from Fort Resolution with Canadian Airways' pilots.

McFarland, who has been trapping in the north for the last seven years, reported the mildest winter in the Fort Reliance area since he has been there. Winds have been exceptionally strong, however. The catch has been mostly white fox there this year, he stated.

Last October he saw huge caribou herds ranging in number from 10,000 to 40,000 animals.

"People down here would never believe how large these herds are," he said. "I got within half a mile of them and it was a sight worth a lot of money to a film producer," he exclaimed.

"The average trapper in the Northwest Territories is continually in debt. Once you get up there it is hard to make enough money to make the expensive trip out again," he stated.

McFarland was taken ill and was brought into Fort Reliance by a neighboring trapper, from his cabin 120 miles east of the fort on the headwaters of the Thelm River.

He came down with the R.C.M.P. Patrol to Fort Resolution and on to McMurray by aeroplane.

Use Of Narcotics

Alberta May Take Matter Up With Federal House To Check Evil

Action to check the illegal use of narcotics in Alberta will be taken up with the federal authorities, according to statements made in the legislature by Hon. George Hoadley, Minister of Agriculture.

At the time, the minister was speaking of investigations of the reported prevalence of doping or drugging of race horses in Alberta, about which inquiries had been made in the House last year by Col. F. C. Jamieson, Conservative, Edmonton, and J. J. Bowlen, Liberal, Calgary.

Referring to the question, Hon. Mr. Hoadley said it was one of supreme importance, particularly from the viewpoint of the dangers if the drugs ever got into the hands of people to be used indiscriminately. It was a matter which would be taken up with the authorities in Ottawa he declared.

To meet the problem of the growing population and resultant congestion in mental institutions in this province, the government proposes to make use of one of the agricultural schools, it was stated by the minister.

More room is required for 100 chronic female cases in mental institutions and it is these which it proposed to place in one of the agricultural schools.

As capital expenditures were taboo in these times, the school would serve as a stop gap and it was hoped that the House would approve the scheme, he said.

Moslem Pilgrims Use Cars

Machines Have Replaced Camel Caravans To Large Degree

The camel has at last been affected by the machine age.

Moslem pilgrims who cross the Arabian Desert to the holy city of Mecca, near the famed Red Sea, now use the automobile to a large degree instead of the camel, according to the commerce department.

Camel caravans were formerly employed exclusively to transport the pious overland from Egypt, Syria, Iraq and other parts of the Moslem world to the place of pilgrimage.

Hard-surfaced roads have replaced caravan routes.

Had His Sympathy

Years ago, a young lawyer, M. H. Aylesworth, now president of the National Broadcasting Co., was defending a western farmer against some bankers who held an overdue mortgage against Aylesworth's client, on which they were trying to foreclose. The farmer lost, and when informed he would have to give up his farm, burst into tears.

"Don't cry, please," one of the bankers said sympathetically, patting the farmer's shoulder, "Everything will come out all right."

"I'm not crying for myself," the farmer sobbed. "I'm crying when I think of you bankers going into the farming business."

It has just been discovered that in 1816 London had a baby clinic where mothers could take their children and receive advice.

Garden Notes

Developing the Vegetable Garden To Its Full Possibility

(By Gordon Lindsay Smith)

In the Old Country a vegetable calendar, like the one hung on the wall, includes every month in the year. In other words, the man across the Atlantic expects a continuous supply from his vegetable patch. How different is the case here where the average man is content if he can have new potatoes ready by early July, and corn and tomatoes by the middle of August. There is nothing much expected before the end of June, nor after mid-September; that is, if we except some potatoes and, possibly a pumpkin or two put away for winter use.

But while we are not favoured with a very long growing season, it is true, we have compensation in hotter sunshine and longer hours of daylight which permit us to grow many things that Britain, for instance, must import, and if we take full advantage of the long lists of vegetables we can grow, our calendar might be extended almost the year round. In the winter, besides enjoying our own cabbage, carrots, potatoes, turnips and similar hardy things from the cellar, we may have fresh rhubarb and mushrooms growing in the same place.

If we possess a hot bed or bit of a greenhouse we may have lettuce, cress and radish ready for the table in March. Asparagus, rhubarb, perennial onions and parsnips come along the first thing in the spring, and these are followed by lettuce, radish, spinach and similar things which are ready for use from three to six weeks after planting. Fifty days after sowing, the earliest peas are ready and by using an early, medium and late pea, or successional plantings, we may continue using them for weeks. The first thinning of beets make excellent greens and are taken out six weeks after sowing. Baby carrots are delicious and are ready about the same time. By making several sowings and using early, as well as late, types we spread the supply of fresh vegetables over the entire growing season. Late white corn will remain in perfect condition for several weeks after frost if we cut stalks and all and store, and tomatoes will continue to ripen until Christmas if vines are pulled and hung up in the cellar. By handling the well-known vegetables in this fashion, and by gradually extending our list of new things until we have tried everything offered in the seed catalogue, we can develop our vegetable garden to its full possibilities.

General Layouts:—Though we exercise our ingenuity or architectural skill and our pocket books to the utmost, a house without growing things about it is but half complete. Something is needed to soften the harsh lines and to tie the whole affair down to Mother Earth. To do this the gardener uses a variety of material, trees, flower beds, vines, shrubbery and trees. The general theory is the same in all cases, but the effects are individual. If the property is our own we will use permanent things in the way of creepers and shrubbery, but if we simply are a tenant and expect to move in the near future, we may depend upon annuals entirely and make a fairly good job of it, because under this heading we have vines which will grow from ten to fifteen feet in a single season and tall plants, such as Cosmos, Mexican Sunflower and Castor Beans, that will serve excellently in place of perennial shrubs. Even in the case of a property owner, it is a good thing to work in plenty of annuals during the first few years, while the other plants are getting established.

Avoid formality because only the most expert can handle straight lines with any chance of success, and often he makes a mess of it. Irregularly shaped main borders, with clumps of one variety and color, and the small stuff generally in front, is the simplest and most effective way of handling the flowers. Against the house one can use any of the clinging vines, while semi-clinging things like the Rambling Rose, Dutchman's Pipe and narrow California Cedars close to the walls are effective.

Magistrate—"The traffic policeman says you got sarcastic with him."

Mr. Nagger—"But I didn't intend to be. He talked to me like my wife does, and I forgot myself and answered. "Yes, my dear!"

A chain of meteorological stations, linked with posts in the Arctic, the tropics and Antarctic, in daily radio communication with a central bureau, is the ambition of Sir Hubert Wilkins, adventurer and scientist, he told Interviewers at Winnipeg.

Abolition of speed-limit regulations to be replaced by provision placing onus on drivers to run their cars at a speed warranted by circumstances not to endanger the life or property was approved by the Ontario Motor League meeting in Toronto.

Greece Barters With Canada

System Sanctioned By Recognized Government Now In Effect

First official system of barter receiving sanction in modern times from a recognized government came into effect February 16, when the Republic of Greece permitted importation of a selected list of commodities only in exchange for Hellenic products, it was learned from officials of the Montreal Board of Trade.

Products which must henceforth be exported to Greece on the barter plan include fresh fish, fresh fruit, shoes and other leather products, furs, furniture, iron products including iron pipes and tubes, perfumes, toys and pencils.

The barter plan is of great interest to industrialists the world over, particularly in the United Kingdom and France, but what effect the Hellenic experiment will have on Canadian export business is not known here.

For Cadet Training

House Of Commons Passes Vote For $300,000 For This Purpose

The House of Commons passed a vote of $300,000 for cadet training, defeating an amendment by Miss Agnes MacPhail (Prog., South-East Grey), to decrease it by $30,000.

The question of cadet training in Canadian schools came up for discussion again when the national defence estimates were under consideration. When this item, amounting to $300,000, was being considered it met with considerable opposition.

A motion was before the committee, moved by Miss Macphail, that the vote be decreased by $30,000, an amount equal to the objective of the United Charities of Ottawa for its work in the interests of needy children.

Ancient Tortoise Dead

Inmate Of London Zoo Was 200 Years Old

London's oldest resident died at the ripe age of 200. He was Sopa, a tortoise of the London zoo, who first saw the light of day in the Galapagos Islands about the time when George Washington was in the cradle.

Sopa was so big he carried children for rides on his back and so old he creaked when he walked.

The London zoo still has an American alligator 120 years old, and two tortoises well over the century mark, but Sopa was the most ancient of them all.

517

A RAVISHING BLACK CREPE DRESS FOR DINNER SUNDAY NIGHTS AND EVENING WEAR

Whether you carry this model out in black crinkly crepe silk, white crinkly crepe or printed crepe silk, the effect is adorable.

Note how charmingly the deep armholes are finished with applied bands, which if you like, can be of sequins. The belt may also be of sequins.

The lower bodice is fitted with pointed front seaming to cut breadth. The slim skirt has a comfortable hem fulness.

It's a model too that is stunning for cruise wear and later for summer evenings carried out in white chiffon with silver coin black dots.

Style No. 517 is designed in sizes 14, 16, 18, 20 years, 36 and 38 inches bust.

Size 16 requires 3¾ yards 39-inch with ⅞ yard 39-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Chinese Woman Barrister

Now Practicing Law In Hong Kong With Unusual Success

Young China's rapid march toward modernism which has seen, among many other reforms, the elevation of the status of women in business and the professions, recently resulted in the advent at Hong Kong of China's first woman barrister. The first of her sex to don wig and gown in China is Mrs. Lo Soon Kim Tee, whose admission to practice in Hong Kong was sanctioned by Chief Justice Sir Joseph Kemp. She belongs to a well-known Nanking family and came to Hong Kong from Singapore where she practiced law.

Mrs. Soon, Hong Kong residents report, came into prominence when she successfully defended a Chinese at the Singapore Assizes who was charged with murder. Her conduct of the case was masterly and dramatic to a high degree. Educated in England, she studied law at the Inner Temple for three years before her admission to the Bar in London, in June, 1927.

First Man Wounded In War

Victim Of Frontier Clash Has Just Died In France

M. Laibe, the first Frenchman to be wounded in the World War, has died near Belfort, France. M. Laibe, who was a Customs officer in 1914, was on duty at Suacre on the Sunday before the war had been declared and the first frontier clash occurred. A German Uhlan detachment crossed to French territory, requisitioned horses, carts, and cattle, and took several inhabitants of Suacre with them as hostages. M. Laibe was with a frontier patrol, comprised of Customs officers which came up at that moment. The Uhlans fired on the small party, wounding M. Laibe, and then fled, abandoning their booty.

Cleopatra was the last queen of Egypt.

Recipes For This Week

(By Betty Barclay)

BAKED BEAN LOAF

Baked beans (No. 2 tin)
1 cup bread crumbs.
1 onion, chopped.
1 egg.
½ cup liquid—evaporated milk or liquid from a canned vegetable.
Salt, pepper, paprika.

Chop or mash the beans and add crumbs, liquid, beaten egg and seasoning. Shape into a loaf, cover with slices of bacon and bake in a moderate oven, 350 degrees, for 30 minutes. Serve with mushroom-tomato sauce. This may be made of canned tomato soup or of canned tomatoes.

BAKED PRUNE WHIP

2 cups cooked prunes.
1 teaspoon grated lemon peel.
2 teaspoons lemon juice.
4 tablespoons powdered sugar.
4 egg whites.

Pit prunes and beat to a pulp. Add lemon peel and juice and 2 tablespoons sugar and blend well. Beat whites of eggs until stiff, add 2 tablespoons powdered sugar and continue beating until stiff. Whip prune mixture by spoonfuls into egg whites. Pile lightly in pudding dish and bake in a moderate oven (350 degrees Fahrenheit) or 20 minutes.

A certain gentleman arrived late for a concert and inquired from the person sitting beside him what the orchestra was playing.

They have just finished the Ninth Symphony."

"H'm am I as late as that?"

By this time, father has tired of playing with the electric train Junior got for Christmas.

It is not always wise to tell all one knows, but it is well to know all one tells.

+ Do You Know? +

Photograph, Canadian National Railways

THAT when the sap begins to run in the Maple trees in southern Quebec it is accepted as a sign that Spring has come and so the restraint of winter is thrown off and crowds of people, young and old, gather in the sugar maple groves to make merry? It is the first picnic of the year in Canada. The old time fiddler is on hand and couples dance on the dead leaves while others drink the sap or dip their sugar paddles in the syrup that is being boiled down into sugar. The photograph shows a section of a gay party in a Quebec Maple Sugar grove.

Against Nature's Laws

Fruit Without Pips Is Product Of Horticultural Experiments

"Because certain fruits do not conform to Nature's laws, humanity is able to enjoy their dessert without the nuisance of pips." Such was the interesting statement of a Covent Garden importer. "Sex laws apply to plant life just as they do to the rest of Nature," he went on. "Speaking generally, no fruit can grow unless it has been fertilized. Where no such 'marriage' has taken place, the fruit withers and dies. Eons ago, certain fruits, including the banana and the breadfruit, rebelled against these laws, and for some reason unknown to scientists the trees were capable of producing sexless fruit. That is the reason why there are no pips in bananas.

"Horticultural experiments in this regard were undertaken some years ago with oranges, grapefruit and pineapples; and after years of unsuccessful trials the seedless fruit was at last produced. It is now only a matter of time for growers to discover methods whereby seeds can be completely eliminated from all kinds of fruit."

Bad Habits

Accumulating Things That Tend To Make Us Poorer

A traveller riding through a barren stretch of country saw an old man cultivating a field, and stopped to talk to him. The field was dry and rocky and the crops were poor. The old man seemed industrious and hard-working, and the traveller felt sorry for him. "You seem to have rather poor soil here," he began, "do you own much of this land?"

"Yes, I've got quite a heap of it," replied the old man, "and the more a man's got of this kind of land the poorer he is. That's like some other things that folks have sometimes, isn't it?"

No doubt we can all think of some things that make us poorer for the possessing. Bad habits, particularly, belong to this classification. No matter what the bad habit may be— laziness, procrastination, lack of system, hasty temper, vigilancy—we can see that these things make us poorer each day. Is it not foolish for us to go on accumulating these things when we know that they make us poorer.—From Great Thoughts.

One Of Queerest Memorials

Felt Hat Hangs By Roadside In New South Wales

By the side of the road which winds up from Comara, in the back blocks of New South Wales, hangs the strangest of memorials. It is an old felt hat.

Time-worn and battered, and covered with moss, it has been there for thirty years. The farmers going down the road in their carts (or newer cars) point it out, and to a stranger will say that it is all that is left of poor Frank Burke.

Burke was driving a cart along the cutting by the precipitous bank when some unknown cause frightened the horse. It bolted; and horse, cart and driver went over the side. The cart was smashed to splinters far below. The horse, strangely enough, was found half-way down the bank unhurt. But the driver was killed.

They found his body after a search and some man in the party took the hat which lay beside him and hung it on the branch of a tree. There it remains, and nobody touches it or ever thinks of moving it.

Tourist Traffic Lower

Number Of Canadian Cars Travelling Abroad Also Less Last Year

The tourist traffic showed a falling off of 1,832 compared to 1931, according to returns by the Department of National Revenue. Automobiles entering last year for less than 24 hours totalled 2,067,367 and the year before 2,439,492. For periods not exceeding 60 days, 1,032,081 entered last year and 1,469,763 the year before. For longer periods, however, there was an increase, those staying up to six months totalled 5,536 last year and only 744 the year before.

The number of Canadian automobiles touring abroad was also reduced last year, totalling 376,534 and the year before 536,355.

The figures for western provinces of last year's entry of tourist automobiles for 24 hours, 60 days and over 60 days, respectively, follow: Manitoba, 32,999, 11,593, 12; Saskatchewan, 16,096, 4,632, 6; Alberta, 17,726, 3,854, 1; British Columbia, 49,466, 94,366, 48.

Kwangsi Province in China is constructing a model cement plant.

March Winds Hurt The Complexion

Keep the skin perfectly healthy by washing with Baby's Own Soap using tepid or warm water and drying perfectly, and the keenest winds will do no lasting damage. This is the prevention which will save much disfigurement and the necessity of hiding blemishes under powder and cosmetics. The soothing and fragrant lather of Baby's Own Soap is wonderfully agreeable. Individual cartons—10c everywhere.

"Its best for you and Baby too"

On Verge Of Starvation

Eskimos At Chesterfield Inlet Reported To Be Short Of Food

A poor run of white fox and deer in the Chesterfield Inlet country, 450 miles north of Churchill, have left the Eskimos on the verge of starvation this winter, according to the Rev. Father Emmanuel Duplain, Roman Catholic missionary at Churchill, who has arrived from the north.

The missionary says that the natives will be able to get through the winter, but supplies are low. Last summer Father Duplain took supplies to the hospital-mission at Chesterfield with the motorship "Theresa." It was his intention to make several trips, but engine trouble and bad weather prevented him from making scheduled trips and he was unable to take more than a few tons of supplies to the post.

Before making the final dash south to Churchill, Father Duplain and a crew, hunted walrus near Walrus Island, south of the inlet. They got 18 walrus, averaging 1,000 to 1,500 pounds. These were taken back to the inlet and given to the natives.

Two Eskimo dog drivers arrived at Churchill mission in January with mail from the hospital at Chesterfield. They brought word that the Polar year party of Canadian scientists who are studying aurora and earth currents, are all well and studying natural phenomena according to schedule.

Radios In Canada

Statistics Show That There Are Sixteen Sets For Every 100 Farms in the Dominion

There are 16 radios for every 100 farms in Canada. British Columbia farms are the most liberally provided among the provinces of the Dominion, with Ontario second and Saskatchewan third. The number of radios per 100 farms in British Columbia is 23, in Ontario 21, and in Saskatchewan 20. Manitoba and Alberta each have 18 radios per 100 farms, while in Nova Scotia and Prince Edward Island there are eleven, in New Brunswick eight and in Quebec six. The total number of farms in Canada is 728,623 and the number of radios on farms 116,354.

These figures are taken from a bulletin issued as a result of the 1931 Canadian census. It analyzes the returns in regard to radios in much detail, and shows an average of 74.32 radio sets for every 1,000 of the population. In regard to the number of radios in proportion to population Ontario leads with 106.2 per 1,000, while British Columbia is second with 95.2 and Manitoba third with 64.6. Alberta comes fourth with 60.6, followed by Saskatchewan with 60.0, Quebec with 52.4, Nova Scotia with 50.1, New Brunswick with 38.6 and Prince Edward Island with 35.0. The Yukon mining district has 16.5 radios for each 1,000 inhabitants.

The birch tree sheds its bark annually.

CHAPTER VI.—Continued.

"To buy it? You making a trip? Go ahead, take it and use it, Alan."

"But I'm not bringing it back. I'm leaving this country in it. How much?"

Drummond was all tangled in Alan's swift words. "That canoe isn't worth a lot. . . . . You're leaving this country. . . . . The motor cost me a hundred but it's three years old. . . . You're not bringing it back? . . . . I guess fifty dollars, Alan. But what in the name of sin—?"

Alan gave him the fifty and strode out the door.

Down the terrace at the steamer landing, Joyce was waiting for him, as he had asked her. Laying his pack in Drummond's canoe and untying the painter, Alan stood holding it, hat in hand, for a few last words with Joyce.

He said slowly, lengthening these last moments with her: "Joyce, I'm going away. I'm going after those six men. Bill will tell you something about it. I arranged with him to visit you whenever he can, and old Dad Fence is going back to the Alooska to be company for you."

Though she asked no questions about his trip, her dark eyes were big with wonder. Alan was tempted to tell her all. He could depend on her not to breathe one word of it. A score of times he had confided police secrets to her and she had given him invaluable information gleaned from Indians and breeds.

But his plan was a desperate gamble, and Joyce would surely recognize it as such. She might lose faith in so dubious a venture. And he thought: 'I'll be entirely out of the country, out of it for weeks and weeks. She mustn't know that; she'd feel too terribly alone; she might even come to believe I've deserted her, as I did last winter. But if she thinks I'm still here on the Waterways, perhaps working secretly, it'll help her keep up hope."

"Joyce," he instructed her, "I'd like for you, there at the trading post, to question these Indians and metis when they bring in poultry. You might pick up some information about those six men."

"I'll do it, Alan. And if there's anything else, to help you—"

"There isn't except to keep your courage up and be careful of yourself. Joyce, if you'll promise to take care of yourself there on the Alooska, I'll go away feeling a mighty lot happier. I'll be worrying about you."

"I'll get along, Alan,' she said simply.

As she gave him her hand, wishing him good fortune on his venture, Alan had a vision of the lonely, fear-torn weeks ahead of Joyce. He was all sympathy and tenderness for her—so brave a girl, so loyal to her dad, so spirited and pretty.

He was shaken with the temptation to tell Joyce of the secret and powerful circumstances which had torn him away from her and made inevitable his engagement to Elizabeth. He had done Joyce a wrong; he owed her a confession and an explanation of his motive. But there were reasons that kept him silent. He had fought that fight in his own conscience; he had acted deliberately. To tell Joyce of it now would avail nothing. He felt that Joyce, however much she had loved him once, had gone back to a casual friendship with him now, and a resurrection of their intimacy would be painful to them both.

With a handclasp, a final word of cheer about her father, he stepped into the motor canoe, started the engine, headed the boat out from the shore. Looking back, he watched Joyce's slender figure grown more and more wraith-like in the mist until his eyes no longer could see her.

* * * * * * *

Over at the MacMillan trading post Joyce was awaiting a visit from Bill Hardsock. A young Loucheux, John Tabanask, had brought a note from Bill, saying he would be along some time late this evening.

This last week had been a feverishly busy one for her. With no hesitation she was sacrificing the entire trading stock. Word of her good bargains had gone out by moccasin telegraph, and the peltry was rolling in beyond all her expectations. Her days were from twenty to twenty-four hours long. Hasty meals for herself and old Dad Pence. Sleep in broken bits when she could snatch an hour or so. Sorting and grading furs as expertly as any man. It was work for any two men, and she was doing it lone-handed, earning the fur-dollars to fight her dad's battle.

Faithfully carrying out Alan's instructions, she had done a bit of detective work on her own account. But she failed to gleam the slightest hint of information.

The mystery of the bandits' sudden appearance engrossed her, as it had Alan; and with good reason it made her keenly uneasy. Those men were hiding in the Thal-Azzah, not many hours distant. Knowing in her heart that her father was innocent, she believed that they had put that fateful pack of furs in the shed because of some animus against him. Their hostility might extend to her, his daughter; and they might make some attempt against her. There were times, when she thought of those vicious brutal criminals so near her, that she wanted to flee back to the safety of the post and the mothering of Mrs. Drummond.

It Was Work for Any Two Men and She Was Doing It.

Before she left Endurance, Bill had told her that Alan had bought out and had severed relations with the Force for good and all. That was the news which Joyce had been brooding about. Elizabeth had wanted him to get out of service. He was out now. Elizabeth had wanted him to take that Victoria job. He probably would take it now. Elizabeth had had her way with him. The thing which had held her and Alan apart no longer existed.

For more than a year Joyce had seen Alan Baker slipping away from her, little by little. She had fought for her secret hopes as one will fight in the face of death. She wanted Alan! her days were like a passionate cry for him. He was the meaning and purpose of life to her, and she could no longer bear up under her racking doubt. She, too, had come to the parting of the ways, and must take some irrevocable step.

In the twilight she heard the drone of Bill's motor canoe down the Alooska. When the craft swung around a bend, she stood up and waved. Catching sight of her on the jutting rock, Bill glided in alongside.

He held a warm place in her heart. He had a man's stubborn will power, he was honest and open as daylight, he was loyal clean through. Joyce knew that Bill loved her, in a dogged hopeless way, asking nothing more than to do favors for her and be always dependable when she needed some one. She was sorry for him, terribly sorry he loved her. For his sake she had several times rebuffed him; but it hurt Bill so visibly that she had stopped.

She invited him: "Bill, let's go up to the post. You're tired. And I'll get you a bite to eat."

"I can't Joyce," he reluctantly refused. "I've got to light out for Endurance. I just wanted to drop past and see that everything is all right with you. How've you been making out?"

"Better than I even expected. I've taken in an awful lot of furs."

"That's good. But I mean, any trouble with these 'breeds or Smokies?" He spoke rather belligerently toward a hypothetical enemy of hers.

"Not the slightest bit," Joyce assured him. That was not exactly true; a couple of incidents of the last week had been a little ugly. But she felt she could guard herself against those cowardly men.

She asked rather hesitantly, "Has anything happened at Fort Endurance, Bill?" She was thinking of Elizabeth waiting there, and that beating question crowded out even her father's trouble. It took an effort to speak of it. Bill knew more of Alan's plans than she did. He might know the answer to that question.

He said: "No, nothing much has happened. I moved up to Alan's cabin. Haskell has made Whipple a corporal. Imagine that! The new doctor for Hershell Island came past on his way down north, and looked at Larry. He couldn't do any more than Father Cleverly has done. Larry's getting some strength back, and that chest wound is past the danger point; but his leg is all busted. The doctor said Larry'll be permanently crippled. No hope of anything better."

"Have they sent — Is Dad still there?"

"Yes. We can't spare a man to take him out. He'll be there a week or ten days yet."

"You'll tell him about my good luck here, Bill? And tell him I'll be with him as soon as I close out this post?"

Bill nodded. Personally he hoped that this news might lift Dave MacMillan out of his despondency. Dave's state of mind was causing Bill anxiety. Resenting any kindness, he had sunk into sullen mood, uncaring, hopeless—a man brooding self-destruction.

Joyce forced herself to ask, "Have you heard anything at all of Alan, Bill?"

"No, not a word. I don't expect to for some time."

"You must know where he is and what he's doing. . . . ."

Bill realized she was asking him to tell her of Alan's venture. He wanted to tell her; and he knew he could trust her, but Alan had asked him not to let her know where he'd gone, and Alan might have personal reasons for it.

He lied: "No, I don't know. I'd just be guessing."

"But he's coming back, sometime, to Endurance?" Joyce persisted.

"He may come back and may not. But not to stay. He's out of service, broke away compiete. He turned his cabin and things over to me. He isn't intending to come back. I know definite. He's going to take that job in Victoria. Told me. One of the last things he said."

There was a moment's silence. Bill looked down curiously. She was staring down at the rock, plucking with trembling fingers at the wolf-foot moss, she was pale. "Did Alan say—" the words came slowly, like reluctant footsteps—"say anything about when he'll get married?"

"He didn't exactly say when, but it'll be as soon as he's carried through this scheme of his."

(To Be Continued).

Australia Bans Flying Over Dangerous Areas

Defence Ministry Objects To Expense Of Rescue Expeditions

Indiscriminate flying over dangerous areas, particularly the desert regions of Australia, has been prohibited by the defence ministry. The defence department has been put to heavy expense and military aviators have risked their lives in rescues in the wilderness.

In the future airmen and their passengers must guarantee the cost of any rescue expeditions necessary and their 'plane must be certified as suitable.

Probably Means Opposite

But Policy Of U.S. Paper Hardly Seems Consistent

Contributors to Mr. Hearst's morning paper opposite editorial page, which editorial page sizzles almost daily with a "Buy American" editorial, are G. K. Chesterton, London; Rebecca West, London; Aldous Huxley, London; Bruno Lessing, St. Cloud; Havelock Ellis, London; Guglielmo Ferrero, Geneva; V. Sackville-West, London; E. V. Lucas, London, and Bertrand Russell, London. Still, maybe opposite editorial page means opposite editorial.—New York Herald Tribune.

FREE TRIAL OFFER OF KRUSCHEN

If you have never tried Kruschen—try it now at our expense. We have distributed a great many special "GIANT" packages which make it easy for you to prove our claims for Kruschen. Ask your druggist for the new "GIANT" 75c. package. This consists of our regular 50c. bottle together with a separate trial bottle—sufficient for about one week. Open the trial bottle first, put it to the test, and then, if not entirely convinced that Kruschen does everything we claim it to do, the regular bottle is still as good as new. Take it back. Your druggist is authorized to return your 75c. immediately and without question. You have tried Kruschen first at our expense. What could be fairer? Manufactured by Griffiths Hughes, Ltd., Manchester, Eng. (Sodium Fluo). Importers: McCliveray Bros., Ltd., Toronto.

Regional Fairs

All Class "B" Fairs Abolished In Western Canada

All "B" class fairs have been abolished in western Canada and, in their stead, regional fairs are to be held this year. This information was obtained from the Department of Agriculture.

There is more in the announcement than a mere change of name. The department intends to convert the old "B" class fairs into more of community contests, with all sections of the country surrounding the locale of such fairs competing for the prizes.

The new regional fairs will receive a federal grant of $1,500 each, which is the same as last year's grants to "B" class fairs, with an opportunity of earning an additional $500 if certain condition are fulfilled. These conditions have to do with the setting up of show classes with the control of entries and similar matters. The managements of all the fairs are fully apprised of the conditions, having received letters from Ottawa dealing with them at length.

There are three fairs in Manitoba which will now be classed as regional, Dauphin, Carman and Portage la Prairie. In Saskatchewan there are seven, Estevan, Weyburn, Yorkton, Melfort, Prince Albert, North Battleford and Lloydminster.

THE RHYMING OPTIMIST

By Alice Michaelis

REQUEST

There is one gift which I would ever keep
Until this clay, now so replete with life.
Shall crumble slowly in the last long sleep.
And lie, forgetting all of joy, of strife.
It is the priceless dower on me conferred
That makes me sometimes tremulous with bliss.

The soul that finds the song in every word.
The hidden mood in every light wind's kiss.
It clears the sight which, piercing through dim ways,
Sees sudden beauty in the slanting rain
Or on the wings of some bright bird that strays
From shores exotic, and comes not again.
This is the gift I ask, this golden dower
Of sensing secret charm in every hour.

The Land Of the Heather

"I'm tired of hearing about Scotch heather. There is more heather in South Africa than Scotland ever dreamed about. They have at least 300 varieties." This was one of the aside comments on South African vegetation made by Prof. F. E. Lloyd, McGill University botanist, who delivered the Royal Canadian Institute lecture in Convocation Hall in Toronto.

If going hatless doesn't affect the mind, as experts say, it just calls attention to it.

Little Helps For This Week

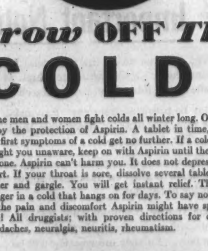

"My times are in Thy hand." — Psalm 31.15.

"Every purpose of the Lord shall be performed."—Jeremiah 51:29.

I am so glad; It is such rest to know
That Thou hast ordered and appointed all,
And wilt yet order and appoint my lot.
For though so much I cannot understand,
And would not choose, has been, and yet may be,
Thou chooseest, Thou performest,
Thou, my Lord,
This is enough for me.
—Frances R. Havergal.

We must not be in a hurry to fix and choose our own lot; we must wait to be guided. We are led on like little children by a way that we know not. It is a vain thought to flee from the work that God appoints us, for the sake of finding a greater blessing for our souls; as if we could choose for ourselves where we shall find the fulness of the Divine Presence, instead of seeking it where alone it is to be found, in loving obedience.—George Eliot.

A load up to 1500 pounds can be carried by a full-grown camel.

Throw OFF That
COLD!

Some men and women fight colds all winter long. Others enjoy the protection of Aspirin. A tablet in time, and the first symptoms of a cold get no further. If a cold has caught you unaware, keep on with Aspirin until the cold is gone. Aspirin can't harm you. It does not depress the heart. If your throat is sore, dissolve several tablets in water and gargle. You will get instant relief. There's danger in a cold that hangs on for days. To say nothing of the pain and discomfort Aspirin might have spared you! All druggists; with proven directions for colds, headaches, neuralgia, neuritis, rheumatism.

The **PRICE GUIDE** *of* **CANADA**

"What would it cost at EATON'S?" is a yardstick of value all over Canada. Prices in EATON'S Catalogue are accepted as the standard by which millions of Canadians appraise just what value they are obtaining for every shopping dollar.

Family Budgets are set by this handbook of the West, and economies often unhoped-for are accomplished. It brings the latest fashions to the smallest communities, and the markets of all the world to the most isolated farm-house. Small wonder that the arrival of each new issue is an event eagerly awaited in hundreds of thousands of Canadian homes.

Accurate descriptions, reliable information, exactly drawn illustrations and clear price markings make it as easy to "shop" from EATON'S Catalogue as over a city counter.

EATON'S 1933 Spring and Summer Catalogue is now ready. If you have not already received your copy, write for it today.
